SUMMARY:

Updates are listed as action items in the event that members feel the need to create motions in response to the material shared. No motions are required to be made.

The **CACC Update** recaps the status of trial court projects being monitored on COT's behalf, some of which are priorities from the previous annual meeting. The CACC chair will also review some key project accomplishments, milestones planned for next year, and challenges faced by current statewide projects, some of which will require (already committed) funding to address.

The **PACC Update** provides progress with probation automation over the past year and a preview of efforts in probation automation over the next fiscal year. Bob will update members on the success of the JOLTSaz statewide version implementation in Pima County, the AZYAS rewrite for supportability, as well as the approach and schedule for the JOLTSaz statewide rollout starting with Yuma County Juvenile Probation.

The **e-Court Update** recaps the progress being made with three “e” projects at the various levels of court. Marcus will update members on specific projects and current timelines for expanding the projects' depth and reach.

The **TAC Update** focuses on key technology topics discussed during the year and the

anticipated work of the subcommittee during the next fiscal year. Karl will focus attention on the need to update technology targets, challenges in the staffing arena, and TAC's proposal to revise the pricing for items beyond PCs /printers that reside on the courts' network, as formulated through the past year. Consideration of the pricing will take place in a separate agenda item.

Presentations received from the subcommittee chairs are attached.
